GROGREEN FRUIT

High potassium nutrition for
fruit development & ripening

GROGREEN Fruit is engineered to provide targeted nutrition to crops during their reproductive and maturation phases. Its high-potassium formula, complemented by magnesium and essential micronutrients, makes it the perfect tool for maximising yield and quality. It's ideal for promoting fruit bulking, enhancing color and sugar accumulation, and improving overall firmness and post-harvest shelf life.

THE ADVANTAGES

Maximise yield and quality

This high-potassium formula is engineered for the critical fruit development and maturation stages. It promotes fruit sizing, enhances color, and increases sugar content for a higher quality harvest. Supported by essential nitrogen, phosphorus, and micronutrients, it ensures your crop has everything it needs to achieve its maximum yield potential and superior shelf life.

Rapid & effective nutrient uptake

This formula ensures maximum nutrient availability for the immediate correction of deficiencies. The advanced gel structure acts as a foliar additive to improve adhesion to the leaf surface, reduce drift control, and improve water retention, while its low pH enhances the solubility and uptake of nutrients. This synergy guarantees a fast and effective response when your crop needs it most.

Easy tank mixing

Designed for maximum flexibility, our formula is highly compatible with a wide range of agrochemicals. Its low pH helps to buffer the tank mix solution, improving the solubility and stability of other products while also preventing the clogging of nozzles and spray systems. This ensures a smooth, trouble-free application every time.

High concentration - low input

Fruit has a very high nutrient content. This allows for lower application rates compared to traditional liquid fertilizers, reducing handling, transport, and storage costs. Get superior results with less product, making it a truly cost-effective choice for your operation.

Available in
5kg pot ~ 1kg pot ~ 200g pot

GROGREEN

5kg pot ~ 1kg pot ~ 200g pot

APPLICATION TIPS

Shake well before use. Apply during cooler parts of the day (early morning or late afternoon) to maximise absorption and minimise evaporation. Ensure thorough coverage of leaves, but avoid excessive runoff.

Always perform a compatibility test when mixing with other products. Do not mix with alkaline materials, combustibles, reducing agents and products containing calcium.

Application guidelines

Designed for foliar application. General dosage varies between 2 - 5 kg per hectare, depending on the crop type, timing and deficiency symptoms.

Never exceed a concentration of 0,5% (5 g/l).

For crop specific recommendations, visit our website or contact your sales manager.

Specifications	Density: +/- 1,80 kg/l	
	W/W	W/V
Total nitrogen (N)	10,00%	18,00%
Nitric nitrogen (N-NO ₃)	4,20%	7,60%
Urea nitrogen (N-NH ₂)	5,80%	10,40%
Total Phosphorus pentoxide (P ₂ O ₅)	6,00%	11,00%
Phosphorus pentoxide (P ₂ O ₅), soluble in water	6,00%	11,00%
Phosphorus pentoxide (P ₂ O ₅), soluble in water and neutral ammonium citrate	6,00%	11,00%
Potassium Oxide (K ₂ O), soluble in water	32,70%	59,00%
Magnesium Oxide (MgO), soluble in water	1,10%	2,00%
Boron (B), as boric acid, soluble in water	0,010%	0,018%
Copper (Cu), EDTA chelated, soluble in water	0,002%	0,004%
Iron (Fe), EDTA chelated, soluble in water	0,050%	0,090%
Manganese (Mn), EDTA chelated, soluble in water	0,025%	0,045%
Molybdenum (Mo), as sodium salt, soluble in water	0,002%	0,004%
Zinc (Zn), EDTA chelated, soluble in water	0,010%	0,018%
